

Program Room H**Sep 18**

Time	Speaker	Affiliation	Title
10:20– 10:40	Whitby	University of South Australia	Yielding and Fracturing of Concentrated Emulsions in Narrow Gaps
10:40– 11:00	Aramaki	Yokohama National Univ.	Effect of perfume solubilization on viscosity behavior in aqueous wormlike micellar sol
11:00– 11:20	Sherestha	National Institute for Materials	Nonionic Reverse Micelles in Nonaqueous Media
11:20– 11:40	Pierlot	Université Lille Nord de France	Classification of Ester oils using C10E4/Oil/Water Systems
11:40– 12:00	Alexander	University of Bristol	Low surface energy materials (LSEMs) from new hydrocarbon architectures
Lunch			
13:00– 13:20	FitzGerald	University of Sydney	Temperature and pH responsive micelles from the controlled polymerization of NIPAM
13:20– 13:40	Iijima	Tokyo Univ. of Sci.	Material Properties of Films and Fibers Made of Chondroitin Sulfate/Chitosan Comple
13:40– 14:00	Nakanishi	National Institute for Materials	Construction of Conjugated Cyclic Molecules through Multiple Single Bond Formations
14:00– 14:20	Sherestha	National Institute for Materials	Fullerene Nanoarchitectonics: From Zero to Higher Dimensions
14:20– 14:40	Watanabe	Kyoto Univ.	Flow Synthesis of Silica@Au Core–Shell Particles by Using Microreactor
14:40– 15:00	Ohnishi	Kobe Univ.	Water and 2–Propanol Structured on Calcite (104): Imaging by Frequency–Modulation ,
15:00– 15:20	Pham	Hokkaido University	Influence of phosphate sorption on dispersion of a Ferralsol Soil
15:20– 15:40	Nishi	Okayama Univ.	Hydration process of zinc ion restricted in cylindrical carbon nanospace
15:40– 16:00	Kanoh	Chiba University	Analysis of Adsorbed States of an Ionic Liquid in Slit–shaped Carbon Nanopores by an

Sep 19

Time	Speaker	Affiliation	Title
10:00– 10:20	Dagastine	University of Melbourne	Mimicing micro–fluidic Pumping Scenarios between Drops and Bubbles using Atomic F
10:20– 10:40	Kasuya	Tohoku University	Characterization of self–assembled monolayer of ferrocene alkyl thiol using electroche
10:40– 11:00	Tallon	University of Melbourne	The Role of Interparticle Forces in the Preparation of Non–Oxide Ceramic Dense Mate
11:00– 11:20	Ishida	Okayama University	Direct Measurement of Solvophobic Attraction between Fluorinated Silica Surfaces by
11:20– 11:40	Joksimovic	Tohoku Univ.	Surface forces across inorganic nanoparticle dispersions and frictional properties unde
11:40– 12:00	Craig	Australian National University	On the stability of nanobubbles at surfaces and in bulk solution

solutions containing anionic–nonionic surfactant mixture

xes

AFM
